Who We Are

Established in 1988, Operations Resource Group is an operations and manufacturing consulting firm located in Sunnyvale, California. We specialize in Manufacturing Operations, Supply Chain Management, and ERP and CRM system implementation. We handle varied assignments for manufacturing, distribution and service companies. Our clients include all sizes of manufacturing, contract manufacturing (job shop), distribution, and service organizations.

What We Do

Our projects and products are aimed at helping our clients to establish best practices and techniques in Manufacturing Operations and Supply Chain Management. Our approach is to work with our clients to achieve solid and quantifiable business systems and solutions that result in lasting benefit. This is done through a combination of consultation, system implementation, project management, and training. The types of projects we work on are:

- Production & Inventory Control
- MRP, MRPII, ERP, & CRM System Needs Analysis & Selection
- MRP, MRPII, ERP, and CRM Implementation & Ongoing Support
- Procurement & Supply Management
- Demand/Supply Planning & Forecasting
- Crystal Reports and Data Mining
- Distribution & Logistics Controls
- Bar Code Projects
- Sales, Marketing and Service Programs

Our Software Products

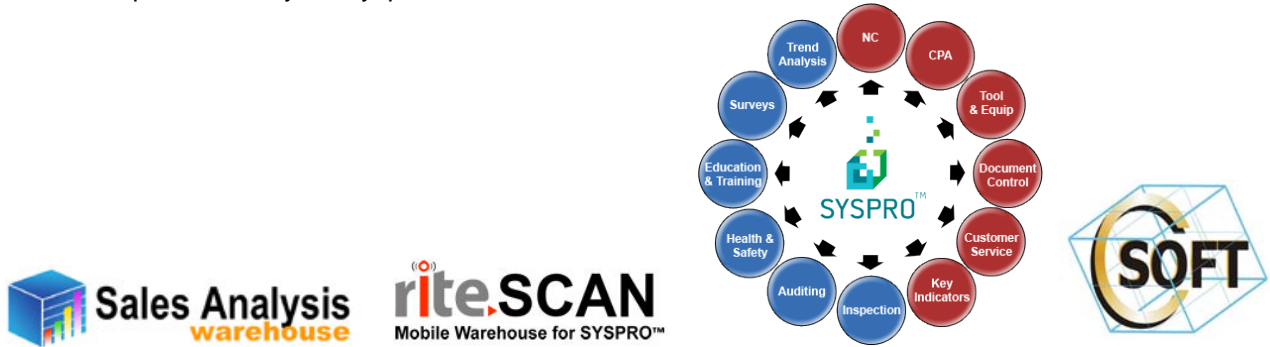

We are a certified VAR for award-winning SYSPRO ERP & CRM software. SYSPRO is a full function, Windows based accounting, distribution, and full manufacturing ERP and CRM system. SYSPRO runs on Windows 2000+ with a SQL or C-ISAM database. It is a modular system, allowing you to purchase only what is needed, and quickly add modules later. Its modern E.Net technology provides ease of customization and powerful capabilities for users. Syspro stability with a 25+ year award winning history, established customer base, and proven growth protects your investment.

Authorized Reseller Partner

Adapt is a leading mid-market CRM software package, offering affordable solutions for customer relationship management. Adapt allows you to execute your mass marketing, automate the sales process, track opportunities, integrate your customer service & field service requirements, and link to your accounting database & Outlook all in one practical package. Adapt comes with pre-developed links to many mid-level ERP systems to seamlessly integrate your accounting data to your sales data.

Other Products: Bar Code System, Sales Analysis Data Mining, Warehouse Management Systems, and Unipoint - Quality for Syspro.
